zip file, I am encountering this error message: The link below provides more details on how to get it running: A: If you want to use OTV/OTI in a PC environment (no standalone installation of Revit), you need to follow this steps: Unzip the "Octane2017.zip" file, you can find the unzipped folder "Octane2017_UnZipped" Go to the unzipped folder "Octane2017_UnZipped" Open Octane 2017.exe Run the exe, you will be asked if you want to install the "Octane2017" Revit plugin, do the following a) On Revit: Choose "Install Plugins" b) On Octane: Choose "Install" Transcriptional expression of vitellogenin and oogenesis in the blood-feeding female tick, *Haemaphysalis longicornis*. In the blood-feeding female tick, *Haemaphysalis longicornis*, vitellogenin (Vg) was shown to be expressed only in the ovaries. Using anti-Vg antibody, it was demonstrated that the female tick had been exposed to the blood meal, indicating the Vg in the female tick had been liberated from the yolk granules in the oocytes at the time of tick feeding. The female tick must have a system for the production and storage of Vg, which was confirmed by using a culture of the tick ovary. As revealed by immunohistochemistry, Vg was

localized in the oocytes, and Vg was also detected in the cytoplasm of the oocytes in the cultured tissue. When anti-Vg antibody was used in the analysis of the cultured tissue, an ovarian Vg gene transcript was found by reverse transcription-polymerase chain reaction, and the transcript was identical to that of the ovary. This transcript disappeared by the addition of 20% sheep serum. These results suggest that the Vg transcript is transcribed in the oocytes of the ovary and that the protein product may be synthesized in the cultured tissue and that the Vg transcript disappears when the female 82157476af
